1.1.1 The institution makes sure that the curriculum is developed and delivered effectively by using a well-organized and a recorded procedure that includes an academic schedule and ongoing internal assessment

Planning a curriculum:

The institute is implementing the syllabus prescribed by the Pharmacy Council of India (PCI) and Dr. Baba Saheb Ambedkar Technological University, Lonere. The academic coordinator gives the head of the department (HOD) instructions to plan the departmental workload according to staff interest, seniority level, expertise, and mutual understanding before each semester in a given academic year begins. Subject distribution is done and department-wise meetings are held with the principal and academic coordinator present. Ultimately, the academic coordinator gathers the workload that has been decided upon at the departmental level and obtains the head's final approval of the organisation.

The academic coordinator has been directed to create a schedule based on the standard hours per week that PCI specifies for every course. It is required of individual teachers to create a course file that contains a question bank, teaching materials, course data, lesson plans, individual schedules, and more. Each year, prior to the start of the academic year, the college forms a number of committees that aid in the smooth operation of the various academic and extracurricular activities. These committees include the internal quality assurance cell (IQAC), programme committee, examination cell, library assistance cell, college development committee, training and placement cell, extracurricular and co-curricular activities, grievance, and anti-ragging committees

Calendar of academic events:

In order to prepare the academic calendar for each semester, the academic coordinator obtains the portfolio planner from the appropriate portfolio heads. This planner primarily contains the schedules for exams (internal assessment, semester-end, and semester session) and activities

related to other portfolios in compliance with Dr. Baba Saheb Ambedkar Technological University's academic calendar.

The academic calendar is uploaded to the institute website, exhibited at key locations, and made available to students at the start of the academic session along with a schedule. During staff meetings, the principal and academic coordinator conduct a periodic review of the execution and advancement of all the activities included in the academic calendar.

Curriculum delivery and ongoing internal assessment procedures:

The academic coordinator and principal oversee the theoretical and practical sessions on a regular basis in accordance with the authorised schedule. The purpose of the regular academic meetings is to assess how the curriculum and academic programmes are being delivered. The college has successfully developed a continuous way of evaluation for students in regular theory and practical sessions, and it has excellently implemented outcome-based education (OBE). Students' attendance, academic activities (such as assignments, open-book tests, group discussions, student-led seminars, and quizzes), and interactions with their teachers are all regularly assessed in theoretical classes.

They are constantly assessed in practical classes for Regular live voice, practical records, and attendance. Curriculum delivery incorporates student-cantered approaches like problem-based learning, active learning, blended learning, cooperative learning, instructional videos, formative assessment & discussion, participatory learning, software demonstration, and learning through case studies, among others. The end-of-semester and internal (sessional) exams are administered in accordance with Dr. Baba Saheb Ambedkar Technological University policies. Advanced learners are encouraged to attend seminars and workshops for scientific presentation, while remedial sessions are planned for slow learners during IQAC and programme committee meetings.
