### **3.2.1 Institution has created an ecosystem for innovations and has initiatives for creation and transfer of knowledge.**

The pharmaceutical sector relies heavily on innovation. Because innovation entails fresh perspectives and concepts in human brains, it should be valued and integrated into daily life. The best places to find creative, forward-thinking brains are colleges, and it's critical to foster society for the advancement of humankind. The optimum setting for innovation is one that fosters fresh idea development. Our goal at SVP COLLEGE OF PHARMACY, HATTA. is to encourage students' creative thinking through the

- **Innovation and IPR Cell.**
- **Cell for Research And Development.**
- **Extracurricular Activities Division.**

At SVP College Of Pharmacy, HATTA., we work to help students acquire the new skills necessary to succeed as entrepreneurs in start-up businesses in the sector. Regular training sessions on communication skills and personality development are arranged by the Training and Placement unit to help students learn how to show and express themselves. Industry specialists are welcome to acquire new technical expertise and stay up to date on industry developments. Through professional talks, efforts are made to raise their awareness of the significance of intellectual property rights (IPR). Under our method of self-sponsored internal research for undergraduate students, many students have engaged in projects over the last five years. The "Research Development Cell" (R&D Cell) at our college, which is made up of the principal and senior members from every pharmaceutical science discipline, is another way we support the research environment. R&D Cell keeps an eye on and encourages students to take part in a range of research competitions, including debate, model-making, quiz, oral and poster presentation, and more. efforts of the Co-activities cell during National Pharmacy Week.

The institute has made available every resource that would be helpful in starting an incubation hub. The central instrument room now has a number of high-tech instruments, including a UV Spectrophotometer, FT-IR spectroscopy, high-performance liquid chromatography, and particle size and zeta potential analysers. The Institute routinely hosts guest lectures on entrepreneurship and starting businesses to help students develop their innovative skills. For the benefit of students, the R&D Cell and the IPR and Innovation Cell collaborate well.
