EVENT REPORT

Name of the Activity	From Research to Royalties: A Comprehensive Seminar on IPR in Pharmacy
Type of Activity	IPR Seminar
Date and Time of Activity	20
Details of Participants	17-02-2018
Resource Person	John Feddrik
Coordinators	IPR Coordinator
Organizing dept.	IQAC Cell
Description	<p>The seminar titled "From Research to Royalties: A Comprehensive Seminar on IPR in Pharmacy" aims to provide a thorough exploration of intellectual property rights (IPR) within the context of the pharmaceutical industry. The event is designed to guide participants through the entire lifecycle of a pharmaceutical product, starting from the initial research phase and extending to the potential financial gains through royalties. By focusing on IPR, the seminar intends to shed light on the critical role that patents, trademarks, and other forms of intellectual property play in protecting the innovations and investments made in the field of pharmacy.</p> <p>The first segment of the seminar delves into the research aspect, emphasizing the importance of intellectual property protection from the early stages of pharmaceutical development. Attendees will gain insights into strategies for securing patents and safeguarding proprietary information, fostering an understanding of how to navigate the complex landscape of intellectual property in the dynamic field of pharmacy. Experts and practitioners in the pharmaceutical industry will share their experiences and provide practical advice to researchers and professionals seeking to optimize their intellectual property strategies.</p> <p>The second part of the seminar focuses on the transition from research to commercialization, elucidating the pathways through which pharmaceutical innovations can lead to royalties. Participants will explore licensing agreements, technology transfer, and the negotiation processes involved in monetizing intellectual property assets. By elucidating the link between research outcomes and potential financial rewards, the seminar aims to empower attendees with the knowledge needed to make informed decisions</p>

Description	<p>The title "Strategies for Global Intellectual Property Management in Pharma" suggests a focus on navigating the complex landscape of intellectual property (IP) within the pharmaceutical industry on a global scale. In the first paragraph, the term "strategies" implies a proactive and planned approach, indicating that the content may delve into deliberate actions and plans for managing intellectual property assets. Given the context of the pharmaceutical industry, this likely involves patents, trademarks, and other forms of IP protection crucial for innovation and competitiveness.</p> <p>The second paragraph anticipates a global perspective in intellectual property management, emphasizing the international nature of the pharmaceutical market. Managing IP on a global scale involves addressing diverse legal frameworks, regulatory requirements, and market conditions across different countries. This could include insights into navigating challenges such as varying patent laws, regulatory approval processes, and market entry strategies, emphasizing the need for a comprehensive and adaptable approach to intellectual property management in the pharmaceutical sector.</p> <p>The third paragraph would likely focus on the specific considerations within the pharmaceutical industry. This might include discussions on the lifecycle of drug development, the importance of protecting innovations from early research to market launch, and potential challenges like patent disputes and generic competition. The strategies proposed could encompass aspects such as building a robust IP portfolio, engaging in strategic partnerships, and leveraging legal mechanisms to safeguard intellectual property assets in a</p>

Description	<p>The title "Innovation in Herbal Medicines: IPR and Industry-Academia Perspectives" suggests a focus on the intersection of herbal medicine, intellectual property rights (IPR), and the collaboration between industry and academia. The first paragraph likely delves into the innovative aspects of herbal medicines, exploring how traditional remedies are being transformed through research and development. This may include advancements in extraction techniques, formulation processes, and the discovery of new therapeutic compounds within herbal sources.</p> <p>The second paragraph likely addresses the crucial aspect of intellectual property rights in the herbal medicine domain. It may discuss how protecting intellectual property, such as patents on unique herbal formulations or extraction methods, plays a pivotal role in encouraging continued innovation. The discussion might touch upon the challenges and ethical considerations associated with IPR in the context of herbal medicines, considering the delicate balance between safeguarding innovations and ensuring accessibility to traditional knowledge.</p> <p>The third paragraph is likely to focus on the collaborative efforts between industry and academia in advancing herbal medicine innovations. This collaboration could involve partnerships, joint research initiatives, or knowledge exchange programs between academic institutions and pharmaceutical or herbal product companies. The paragraph may highlight the synergies and challenges of this interaction, emphasizing the importance of fostering a conducive environment for such partnerships to thrive and contribute to the ongoing evolution of herbal medicine.</p>

EVENT REPORT

Name of the Activity	Pharmacy in the Digital Age: Navigating IPR Challenges in Health Tech
Type of Activity	IPR Activity
Date and Time of Activity	22
Details of Participants	01-07-2018
Resource Person	John Feddrik
Coordinators	IPR Coordinator
Organizing dept.	IQAC Cell
Description	<p>The title "Pharmacy in the Digital Age: Navigating IPR Challenges in Health Tech" suggests a focus on the intersection of pharmacy practices and digital advancements in the healthcare sector. The term "Pharmacy in the Digital Age" implies a discussion about how technology is transforming traditional pharmacy processes, possibly exploring innovations like telemedicine, digital prescriptions, or automated medication dispensing systems. The emphasis on "Navigating IPR Challenges in Health Tech" indicates a consideration of intellectual property rights (IPR) issues within the health technology domain, suggesting that the integration of digital solutions in pharmacy may raise legal and regulatory challenges.</p> <p>In the first paragraph, the title prompts an exploration of the evolving landscape of pharmacy in the digital era. This could involve examining the adoption of digital tools and technologies in pharmacies, their impact on patient care, and the overall transformation of the pharmaceutical industry. The focus might be on how these changes enhance efficiency, improve patient outcomes, or introduce new challenges that need to be addressed.</p> <p>The second paragraph would delve into the specific challenges related to intellectual property rights within the health technology context. This may include discussions on patenting innovations in health tech, protecting software or algorithmic advancements, and navigating the legal complexities surrounding digital health solutions. It could also touch upon how the pharmaceutical industry is adapting to these challenges and the implications for stakeholders involved in the development and deployment of health tech solutions.</p>

t

Shri Dhaneshwari Manav Vikas Mandal's
SVP COLLEGE OF PHARMACY

(D.Pharm & B.Pharm)

The final paragraph might speculate on the future trajectory of pharmacy in the digital age, considering how ongoing developments in health technology and intellectual property regulation could shape the landscape. It may discuss potential solutions or strategies for effectively managing IPR challenges in the evolving health tech ecosystem, and the overall impact on the accessibility, affordability, and quality of healthcare services.

Description	<p>The title "Legal Aspects of Drug Development: A Workshop on IPR for Pharmacy Professionals" suggests a comprehensive exploration of the legal dimensions surrounding pharmaceutical innovation. The workshop seems tailored for pharmacy professionals, indicating a specialized focus on intellectual property rights (IPR) within the context of drug development. This implies an intention to address the complex legal framework governing the creation, protection, and commercialization of pharmaceutical products.</p> <p>The first paragraph of the workshop may delve into the foundational aspects of drug development, elucidating the legal landscape that surrounds the entire process. This could include discussions on regulatory requirements, ethical considerations, and the role of intellectual property in safeguarding innovations. Pharmacy professionals participating in the workshop might gain insights into the legal mechanisms that shape the industry, fostering a better understanding of compliance and ethical standards.</p> <p>The second paragraph may emphasize the specific focus on intellectual property rights (IPR), highlighting the critical role these rights play in the pharmaceutical sector. Topics within this segment could range from patent protection for novel compounds to the complexities of licensing agreements and the challenges posed by generic competition. Attendees may receive practical guidance on navigating IPR issues, thereby empowering them to contribute more effectively to the drug development process.</p> <p>The concluding paragraph might underscore the practical relevance of the workshop for pharmacy professionals, emphasizing its potential impact on their daily roles and responsibilities. Participants may leave the workshop</p>

EVENT REPORT

Name of the Activity	Academia-Industry Dialogues: Enhancing Pharma Innovation through IPR
Type of Activity	Innovation
Date and Time of Activity	25
Details of Participants	22-09-2018
Resource Person	Rupa Dwivedi
Coordinators	IPR Coordinator
Organizing dept.	IQAC Cell
Description	<p>The title "Academia-Industry Dialogues: Enhancing Pharma Innovation through IPR" suggests a focus on the interaction between academia and the pharmaceutical industry, with a specific emphasis on how intellectual property rights (IPR) play a crucial role in fostering innovation within the pharmaceutical sector. This indicates recognition of the dynamic relationship between academic research and industrial advancements in the field of pharmaceuticals.</p> <p>The first paragraph of the summary may delve into the overarching theme of academia-industry dialogues, highlighting the importance of collaboration and knowledge exchange between academic institutions and pharmaceutical companies. It may touch upon the mutual benefits that can arise from such dialogues, such as the translation of cutting-edge research into practical applications and the real-world impact of academic discoveries on the pharmaceutical industry.</p> <p>The second paragraph could focus on the central role of intellectual property rights in this context. It may discuss how a robust IPR framework serves as a catalyst for innovation by providing incentives for researchers and companies to invest in and protect their discoveries. The summary could also explore how effective IPR management can facilitate smoother collaborations between academia and the pharmaceutical industry, ensuring a fair and transparent exchange of knowledge and resources.</p> <p>The third paragraph may highlight the potential implications and outcomes of fostering stronger academia-industry dialogues through enhanced IPR mechanisms. This could include accelerated drug development, increased</p>

Resource Person	Jana Patil
Coordinators	IPR Coordinator
Organizing dept.	IQAC Cell
Description	<p>The title "IPR Challenges in Personalized Medicine: A Specialized Pharmacy Workshop" suggests a focus on the intricate intersection of intellectual property rights (IPR) and the field of personalized medicine. Personalized medicine involves tailoring medical treatment to individual characteristics, and this workshop seems dedicated to exploring the legal and intellectual property challenges within this context. The use of the term "Specialized Pharmacy Workshop" implies a targeted discussion platform, likely catering to professionals in pharmacy and related fields.</p> <p>The first paragraph of the workshop might delve into the evolving landscape of personalized medicine and the critical role of intellectual property in navigating this terrain. It could explore the unique challenges posed by individualized treatments, such as the need for more precise patents and the potential conflicts arising from personalized therapeutic approaches.</p> <p>The second paragraph may highlight the objectives of the specialized pharmacy workshop, emphasizing its role in fostering dialogue among professionals. This could include addressing current gaps in understanding IPR within personalized medicine, sharing case studies, and proposing solutions to promote innovation while safeguarding intellectual property rights.</p> <p>The final paragraph might touch upon the broader implications of effective IPR management in personalized medicine, including its impact on research, development, and accessibility of personalized treatments. It may also encourage collaboration among stakeholders, fostering a supportive ecosystem for the continued advancement of personalized medicine within</p>

Description	<p>The title "Pharmacy and Technology Transfer: Maximizing the Impact of Your Innovations" suggests a focus on the intersection between pharmacy and technology transfer, emphasizing the potential for innovation in this dynamic space. In the first paragraph, one can anticipate an exploration of the evolving landscape where pharmacy and technology converge, possibly delving into how advancements in pharmaceuticals and digital technologies intersect to create novel solutions. This could include discussions on the role of technology transfer in facilitating the exchange of knowledge and innovations within the pharmaceutical industry.</p> <p>The second paragraph might delve into the key strategies and approaches for maximizing the impact of innovations within the pharmacy and technology transfer realm. This could involve insights into effective collaboration models between pharmaceutical experts and technology transfer professionals, as well as discussions on intellectual property management and commercialization strategies. Readers may expect to gain valuable insights into how to navigate the complexities of bringing innovative pharmacy-related technologies to the market and ensuring their widespread impact.</p> <p>In the final paragraph, the title suggests a broader perspective on the significance of maximizing the impact of innovations. This may include discussions on the societal and economic implications of successful technology transfer in the pharmacy sector, and how the convergence of pharmacy and technology can contribute to advancements in healthcare. The title implies a forward-looking approach, encouraging readers to consider the potential of their innovations and how they can be strategically leveraged</p>

EVENT REPORT

Name of the Activity	Innovative Business Models in Pharma: A Seminar on IPR and Industry-Academia Collaboration
Type of Activity	Seminar
Date and Time of Activity	30
Details of Participants	18-02-2019
Resource Person	Manish Patil
Coordinators	IPR Coordinator
Organizing dept.	IQAC Cell
Description	<p>The seminar on "Innovative Business Models in Pharma: A Seminar on IPR and Industry-Academia Collaboration" explores the dynamic intersection of intellectual property rights (IPR) and collaborative efforts between the pharmaceutical industry and academia. The event aims to shed light on emerging business models that drive innovation in the pharmaceutical sector. Participants can expect discussions on how effective management of intellectual property can foster creativity, protect innovations, and ultimately contribute to the advancement of the industry.</p> <p>One focal point of the seminar is the role of Industry-Academia collaboration in shaping the future of pharmaceuticals. The event delves into the synergies and challenges inherent in partnerships between industry players and academic institutions. By bringing together experts from both domains, the seminar seeks to promote a better understanding of how these collaborations can facilitate the development of groundbreaking drugs and therapies. Attendees will gain insights into successful case studies, collaborative frameworks, and the mutual benefits that arise from bridging the gap between academia and industry in the pharmaceutical landscape.</p> <p>Additionally, the seminar aims to address the evolving landscape of intellectual property in the pharmaceutical sector. With a focus on innovative business models, the discussions will cover strategies for navigating the complex terrain of patents, trademarks, and other intellectual property elements. Participants will gain a comprehensive understanding of how to leverage intellectual property to drive competitiveness, foster innovation, and navigate the legal intricacies associated with the pharmaceutical business. Overall, the seminar provides a platform for</p>
