At Hatta, Zero Phata, Tq. Basmat, Dist.Hingoli-431705

**Academic Year 2023-24****Course: B. Pharm Second Year (III Sem)****7.3.1: Portray the performance of the Institution in one area distinctive to its priority and thrust within 1000 words**

The majority of the population in Hatta's small, rural settlements, which encircle the area, work in agriculture and construction. Because of their poverty, they are unable to pay for the modern education of today. Nonetheless, our college has been promoting the overall growth of the residents of those in this region who lack access to appropriate development tools.

As an academic institution, we carry out our obligations and responsibilities following the university's mission and vision. Every program is created and carried out with institutional objectives in mind. Our college's mission is to provide a high-quality education to both affluent and rural communities, as well as to support the growth of rural students and the creation of jobs. The majority of the students come from low-income families and nearby towns. The institution has been successful in educating rural students. The Institution attempts to provide access to information for those students who are willing to learn but reside in an area known for its lack of industrialization and drought.

The college's top priority is the overall development of students who reside in isolated, earthquake-prone places like Hatta and the surrounding area. Every attempt is made to find opportunities for students to engage in a variety of extracurricular and curricular activities. In this sense, the student receives extra attention. Pooja Kute, one of our students, took part in the Avhan state-level camp, which was arranged by Nwami Ramanand Teerth Marthwada University, Nanded, as part of the National Service Scheme. In a university-level sporting competition, Ku. Jyoti Kute placed third in the shot put competition. The students' leadership abilities were able to be showcased because of their involvement.

As part of the college tree planting best practice, the students have contributed greatly. Our college's NSS department plans events like clean-up and planting campaigns. The students worked hard to keep every tree alive throughout the summer. Water was occasionally supplied to the trees. Students' knowledge of the environment is aided by this. Following the college tree-planting best practice, a large number of students have begun planting trees at home and in their communities. Students' awareness of the environment is enhanced by this endeavor.

The college works hard to give students a top-notch education for their overall growth. Good No. of Research Guides and Ph. D. holders make up the college's sufficient full-time teachers. The faculty at our college assists students with admissions and helps them choose appropriate courses based on their interests. The institution's students compete in a variety of events hosted by other universities, including debates, oratory, youth festival competitions, etc. All of these initiatives support the students' intellectual growth.

**Academic Year 2023-24**

**Course: B. Pharm Second Year (III Sem)**

The college hosts several programs on health, gender fairness, and other topics. To raise student understanding of issues like work culture, patriotism, and social responsibility, NSS plans demonstrations and holds campus events. The college provides certificate programs, such as the Spoken English Certificate Programme, For students from rural areas to compete with those from urban areas. Students can receive helpful advice from the college's Competitive Examination Guidance Cell. The Placement Cell at the college has conducted campus interviews for the past three years. The college hosts health, blood, and eye camps for townspeople, employees, and students. For rural students' educational progress, the college is essential. The college holds that knowledge is the only thing that can solve any issue. Our college's top goals are to create jobs and an education that instills ideals, scientific awareness, national integrity, and peace.

Through the NSS, the institution set up a seven-day special residential camp in neighboring communities to instill a work ethic from the student days. Students are encouraged to engage in both academic and physical activities to develop them throughout. Through this camp, kids learn how to live independently in addition to doing their work. The organization promoted water conservation in the adopted villages. The cleaning program, tree planting, and Nala's expansion and deepening were all completed. To conserve water, students created vanrai Bandhara, which raised the water table for nearby farmers. The people gave a good appreciation to the college as a sign of their respect.
